PROFILE

2025 master's graduate and Product Operations Manager at Xiaomi, responsible for new product launches, user conversion and business optimization across multiple European Mi.com markets. Experienced in user and market insights, requirements breakdown and prioritization, cross-functional project delivery and data-driven iteration, with hands-on involvement in internal efficiency tools from requirement definition and rule design through testing and acceptance. Marketing undergraduate background with experience across e-commerce, overseas offline retail and frontline customer service.

PROFESSIONAL EXPERIENCE

Xiaomi | Product Operations Manager (Mi.com International E-commerce) **Jan 2026 - Present**

- Manage Mi.com product operations across the UK, Netherlands, Belgium, Austria, Sweden and Hungary, focusing on product launches, user conversion and on-site business performance. Use search, traffic, sales and conversion data to identify user and market needs, and coordinate country e-commerce, marketing, data and technical teams to deliver solutions.
- Identify key issues and optimization priorities along the user conversion journey. In the Netherlands, adjustments to conversion events, traffic mix and keyword strategy increased CVR from 0.45% to 2.28% and ROI from 0.43 to 10-15, while reducing CPC from USD 0.91 to USD 0.26.
- Support new product launch planning by using historical product performance, market size, user search demand and conversion potential to allocate traffic and resources, while coordinating offers, landing pages and launch timing. UK P12 launch advertising delivered 103 units, USD 100,333 GMV and 15.53 ROI.

Xiaomi | Overseas New Retail Store Development **Aug 2025 - Jan 2026**

- Supported authorized retail network expansion across Indonesia, Malaysia, Thailand, Taiwan, Hong Kong and Korea. Evaluated store and partner proposals using shopping-district traffic, competitors, GMV, rent, sales capability and forecasts to support site selection and commercial decisions.
- Coordinated headquarters, country teams, authorized partners, malls and contractors across partner onboarding, contracts, CRM, system setup and store-opening milestones, resolving cross-functional blockers through clear owners, deadlines, issue lists and escalation paths.
- Analyzed low-performing stores based on sales stability, store maturity and partner capability to distinguish ramp-up issues from structural operating problems and support subsequent optimization and resource prioritization.

PROJECT EXPERIENCE

Advertising Data Automation & Analysis

- Identified a recurring pain point of about 15 hours per week spent on manual data extraction and reconciliation. Mapped 9 business scenarios across 33 markets, defined requirements, KPI logic, business rules and acceptance criteria, and coordinated data and engineering teams through testing and launch. After rollout, weekly data-preparation time fell from about 15 hours to about 1 hour, reducing time spent by approximately 93%.

PROJECT EXPERIENCE (CONTINUED)

AI Advertising Copy Generation & Review

- Addressed fragmented information and inconsistent rules in multi-market, multilingual ad copy production by defining a standard workflow: read campaign inputs -> generate first draft -> check business rules -> human review -> publish. Standardized pricing, benefits, product selling points, URLs and localization requirements; the workflow has been used in live campaigns including POCO Carnival, POCO F9 and RN17.

AI Keyword Review Project (Testing Stage)

- Designed a workflow for the team's recurring weekly keyword screening and review: read advertising data -> identify inefficient or promising keywords -> run a second check -> human confirmation. Defined decision rules and exception checks, then used manually reviewed samples and simulated errors to test result accuracy. The project is still in internal testing.

INTERNSHIP EXPERIENCE

Mango TV | E-commerce Operations Intern **Jul 2023 - Oct 2023**

- Supported consumer electronics e-commerce operations including product listings, pricing, campaigns, coupons, sales tracking and marketing asset coordination, and assisted with online promotion and brand-exposure review for entertainment programs.

Decathlon | Retail Management Intern **Nov 2023 - Apr 2024**

- Worked in high-frequency frontline retail execution and customer service, serving approximately 130 customers per day and responding to shopper needs through on-floor communication and problem solving.

Kater Katze | Cross-border E-commerce Operations Intern **Aug 2024 - Sep 2024**

- Supported cross-border e-commerce order fulfillment, logistics and customs-clearance coordination, maintained and listed 20+ products, and followed up on customer order issues.

EDUCATION

The Hong Kong Polytechnic University | Master of Corporate Governance **Sep 2024 - Jul 2025**

Changsha University of Science & Technology | BBA in Marketing | GPA 3.54/4.00 **Sep 2020 - Jun 2024**

- President, IDEA Elite Club: led 5 functional teams and organized 13 mid-sized campus events. Team Leader, National Business Elite Challenge Brand Planning Competition - National First Prize.
